## **DETAILED ACTION**

## Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a method of reactive sputtering characterized by a magnetic mirror trap.

Group II claim(s) 14-22, drawn to a device for magnetron sputtering characterized by a magnetic mirror trap.

Group III, claim(s) 23, drawn to a device for magnetron sputtering characterized by filter plates.

Group IV, claim(s) 25, drawn to a device for magnetron sputtering characterized by inlets for a sputtering gas.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 4126

- 3. Inventive groups I and II share the same special technical feature of a magnetic mirror trap used in sputtering. This magnetic mirror trap is taught in the art from Misina et al. (J. Vac. Sci. Technol. A 15 (4), Jul/Aug 1997 pg:1922-1928). Misina teaches a sputtering apparatus that utilizes a magnetic field produced by two coils (pg. 1922, sec 1, par.3), wherein the magnetic field is used for confinement of electrons. (pg. 1922, sec 2, par.2)
- 4. Inventive groups II, III, and IV do not share the same special technical feature. Group II is a sputtering apparatus that utilizes a magnetic mirror trap. Group III is a device directed to filter plates. Group IV is a device directed to inlets for a sputtering gas.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Art Unit: 4126

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to IBRAHIME A. ABRAHAM whose telephone number is (571)270-5569. The examiner can normally be reached on M-F 8-4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy V. King can be reached on (571)272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
